OPEN YOUR MIND TO A NEW ERA IN MAKE-UP

## EYES

Permanent eye enhancement can create a defined liner or a subtle shadow. Emphasising your eye colour and making your lashes appear thicker, your eyes will appear larger and more striking.

Convenient for people who suffer with allergies to pollen or conventional eye make-up and for those with contact lens sensitivities, permanent eye enhancement also eliminates eye make-up smudging.

## BROWS

If you have little or no eyebrow hair or would like to perfect the shape of your eyebrows, creating a youthful lift to the eye area that emphasises the eyes, this technique is for you.

Paying close attention to your face shape and colouring, this technique is achieved using fine hair by hair simulation or a subtle colour mist infusion.

## LIPS

Make your mouth appear more youthful by defining the natural lip contour and introducing a haze of colour across your lips. This will give you subtle or dramatic fullness either in an attractive blush of colour or a full lip tint that can be high lighted by adding lip gloss.

Asymmetry can be corrected and no more lipstick re-application after eating or kissing. Your lips will always stay beautiful whatever the situation.

## A SAFE PROCEDURE

Your treatment begins with a consultation to discuss the range of designs, shapes and colours available.

Your permanent cosmetic artist will then create your look in conventional make-up. You can try different looks and colours until you are happy with the effect that is created for you.

Only then does the pigment infusion process take place - achieved using the Cosmedic® device and medical grade pigments, which meet all European health and safety requirements.

Immediately after the infusion process your enhancement will display mild redness and swelling which may last for up to 48 hours. The enhancement will be a darker shade than desired for approximately 1 week - gradually fading to a result which lasts for years.

A follow up session is available 1 month later, paying particular attention to fine detail. This session is included in the initial price.

## **BEAUTIFUL. NATURAL. FLAWLESS.**

Permanent cosmetic enhancement is a revolutionary beauty treatment used to define eyes, brows and lips - to give a soft, natural finish that imitates perfectly applied make-up.

The effect is achieved by infusing hypo-allergenic pigments into the dermal layer of the skin. The result and colour intensity can be as subtle or dramatic as you wish, to give a long lasting look that enhances your natural beauty.

## THE NEXT STEP

The Cosmedic® permanent cosmetics brand is synonymous with quality. Cosmedic® consultants have all been trained to rigorously high standards and use state of the art equipment. Their flare for colour and artistic aptitude ensures a first class enhancement.

We hope that you now have an insight into how permanent cosmetics can benefit you. The next stage is to call or email to arrange a consultation and see the results for yourself.
